

Domo Innovation was founded in 2010 as a division of Sirinfo Srl - an Italian company that has been active in the ICT field for over a decade - in order to apply the experience gained as a System Integrator to the field of Home & Building Automation. Domo Innovation, having become part of the Bticino Altoautomation Team right from the start, boasts partnerships with prestigious brands.

These partnerships have created the technological know-how that enables the company to pursue the path of integration between heterogeneous home automation systems, in order to offer its customers maximum flexibility, performance, design, customization and integration with existing systems.

Domo Innovation is continuously investing in the research and development of new solutions, in order to ensure the highest reliability and flexibility that a home automation system can not do without.

Domo Innovation is a trademark of Sirinfo Srl - Via Luigi De Franco, 26 - 87100 Cosenza (CS) - ITALY -

RTI Driver for Tecnoalarm

The RTI Driver allows the integration between the RTI control system (Remote Technologies Inc.) and Tecnoalarm security systems.

It allows the supervision and management of the main functions of a Tecnoalarm security system.

The RTI Driver is designed for the RTI XP Processor, with a direct access user service via the RTI advanced control system, such as Smartphone & Apple and Android Tablet, remote control, touch-screen, Windows PC.

The supported functionalities, to date, are the following:

- ⇒ **arming/disarming of the programs**
- ⇒ **zones status viewing**
- ⇒ **program status viewing**
- ⇒ **remote control status viewing**
- ⇒ **emulate the keypad display (virtual keypad)**
- ⇒ **activation/deactivation of remote controls**
- ⇒ **general status and alarm viewing (general Power Failure, general tamper alarm, general low battery, etc..)**

EVENTS

Managing of feedbacks from the Tecnoalarm security system and automatic execution of RTI Macro (automated controls series) when a specific event occurs.

More specifically, it is possible to monitor the following events:

- ⇒ General status events
- ⇒ Zone alarm events
- ⇒ Program status events
- ⇒ Remote control events

This driver:

- ⇒ provides TCP/IP communication (or serial) of Tecnoalarm security systems
- ⇒ is compatible with the following Tecnoalarm control panels: TP16-256, TP8-64 BUS, TP8-96, TP16-512, TP8-88, TP20-440. (PROG32 interface is required)

Tecnoalarm

"Tecnoalarm is the epitome of high technology, a valued partner of thousands of installers and final customers who daily entrust the Turin company with the protection of their property and their personal safety. For more than thirty years,

Tecnoalarm has been developing and producing sophisticated alarm systems, guaranteeing its customers high performance, extensive customization capabilities, user-friendliness and refined design. The Pininfarina design in fact permits a perfect blending with any home decoration and architectural framework."

The driver can be used within the RTI "Integration Designer ®" software that is able to easily create the graphical user interface management system, suited to meet the needs of the most demanding customers. Integration Designer ® is released by RTI to dealers and authorized installers.
